Substrates

High performance metal roofing coils are available in Galvalume® and Aluminum. All metal coils are tension leveled for superior flatness.

Warranty

- » 35-Year Non-Prorated Kynar® Paint Warranty with a 20-Year Galvalume® Substrate Warranty
- » 35-Year Non-Prorated Kynar® Paint and 25-Year Aluminum Substrate Warranty
- » 20-Year Non-Prorated International Kynar® Paint Warranty
- » 25-Year Non-Prorated Drexlume™ (Acrylic Coated Galvalume®) Warranty

Trinar® (Fluoropolymer)

Drexel Metals' standard colors are produced by AkzoNobel and contain a minimum of 70% Kynar 500® or Hylar 5000® base resin with ceramic pigments. All standards are formulated to ensure consistent color and quality. The Trinar system is applied over AkzoNobel polyester primer in a minimum thickness of 0.2 mil and can be applied to either Galvalume® HD Galvanized or Aluminum substrates. All topcoats are a minimum of 0.8 mil of the Trinar color of choice. The reverse side is primer and a washcoat of 0.5 mil total dry film thickness.

Drexlume™

Drexel Metals offers a mill finished Galvalume® with a two-sided, clear chromate/ acrylic finish that simultaneously aids roll forming without the use of lubricants and eliminates unsightly handprints or stains resulting from handling and storage. The acrylic finish dissolves naturally over a period of time, and when left as is, allows for natural and even weathering.
